Each year, JAMA Surgery receives hundreds of submissions that retrospectively analyze large surgical databases. Although many of these attempt to shed light on new and important questions, most do not get published. A majority of submissions are not even sent out for peer review because they have clear flaws in the data analytic techniques or they attempt to address a research question that ...

Gastric bypass surgery refers to a surgical procedure in which the stomach is divided into a small upper pouch and a much larger lower "remnant" pouch and then the small intestine is rearranged to connect to both. Surgeons have developed several different ways to reconnect the intestine, thus leading to several different gastric bypass (GBP) procedures.

In 2012, the American Diabetes Association (ADA) and the European Association for the Study of Diabetes (EASD) published a position statement on the management of hyperglycemia in patients with type 2 diabetes (1,2). This was needed because of an increasing array of antihyperglycemic drugs and growing uncertainty regarding their proper selection and sequence.
