Geophysical survey is the systematic collection of geophysical data for spatial studies. Detection and analysis of the geophysical signals forms the core of Geophysical signal processing. The magnetic and gravitational fields emanating from the Earth's interior hold essential information concerning seismic activities and the internal structure.

Physical phenomena. Geophysics is a highly interdisciplinary subject, and geophysicists contribute to every area of the Earth sciences. To provide a clearer idea of what constitutes geophysics, this section describes phenomena that are studied in physics and how they relate to the Earth and its surroundings.. Gravity

130 Pearce, Pa 4 rick, Vaughan This is often written:  $\sigma = pe\mu_p$  (5) where  $\mu_p$  is the carrier mobility of holes in  $\text{cm}^2 \text{V}^{-1} \text{s}^{-1}$ . This equation shows the dependence of conductivity on both carrier concentration and mobility. A similar equation applies to

Glacier flow is a continuous process, but this is very difficult to simulate mathematically. Instead, modellers use numerical methods, which solve equations in a series of steps. Models are split up into grid cells; the numerical methods calculate the change in ice thickness through time (using a series of partial differential equations) for one grid cell at a time, and use the solution as an ...
