Folding, modification, and degradation of proteins The life of a protein can briefly be described as: synthesis,
folding, modification, function, degradation.

Chapter 3

The cell (from Latin cella, meaning "small room") is the basic structural, functional, and biological unit of all
known living organisms.A cell is the smallest unit of life.Cells are often called the "building blocks of life". The
study of cells is called cell biology. Cells consist of cytoplasm enclosed within a membrane, which contains
many biomolecules such as proteins and nucleic acids.
