tions, and other alleged causes of action are supposed to be other than the behavior they cause. In addition, by also subscribing to a Newtonian understanding of efficient cause, these theories have also uncritically assumed that intentions, volitions, or agents cause action in the collision-like way that pool cues cause cue balls to move.

Some of the issues of interest are (1) marking the boundary between action and the rest of behavior, (2) the role of reasons as causes and explanations of action, and (3) the question of free will and individual responsibility. The book offers the reader an opportunity to question much that we take for granted in researching buyer behavior.
