The unit of analysis is the major entity that is being analyzed in a study. It is the 'what' or 'who' that is being studied. In social science research, typical units of analysis include individuals (most common), groups, social organizations and social artifacts.. The literature of international relations provides a good example of units of analysis. In "Man, the State and War", Kenneth N ...

In science and research, an attribute is a characteristic of an object (person, thing, etc.). Attributes are closely related to variables. A variable is a logical set of attributes. Variables can "vary" - for example, be high or low. How high, or how low, is determined by the value of the attribute (and in fact, an attribute could be just the word "low" or "high").

A significância estatística é considerada um procedimento para verificar a discrepância de uma hipótese estatística em relação aos dados observados, utilizando uma medida de evidência (p-valor). [1] Este procedimento foi definido por Ronald Fisher no início do século XX como teste de significância. Entretanto, cabe notar que o termo significância não implica importância e o termo ...
