

ecology sustainable development and pdf

"Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs." This implies that we need to look after our planet, our resources and our people to ensure that we can live in a sustainable manner and that we can hand down our planet to our children and ...

Sustainability and sustainable development - Circular Ecology

Exergy is a key tool for environment, ecology and sustainable development and is an efficient parameter on performance of the system. This study discussed exergy concept and demonstrated its use extensively to describe a variety of systems in particular for built environmental conditioning.
