discover new candidate materials and to screen thousands of compositions in a quick and systematic fashion. The third part of the book is on devices and device characterization. This part consists of a single, extensive chapter by Eric Miller, Alex DeAngelis, and Stewart Mallory on multijunction approaches and devices for solar water splitting (Chap. 7).

'Electronic Materials: Science and Technology' is a comprehensive and up-to-date book covering silicon semiconductor processing technology. It is aimed at senior level or first year graduate student audiences and thus could be a good choice for a textbook with similar coverage to Sze's 'VLSI Technology'.
