the free element in the atmosphere, but only to the extent of less than 1 ppm by volume. The lightest of all gases, hydrogen combines with other elements -- sometimes explosively -- to form compounds.

A Periodic Table of the Elements at Los Alamos National

from two or more elements chemically bonded. Atoms form molecules by bonding together. Atoms give, take, or share electrons to achieve full outer electron shells. Elements in the same group, or column, are similar because they typically have the same number of outer electrons. This table shows some easy-to-remember common numbers for each group.
