Amnesic shellfish poisoning (ASP), also known as domoic acid poisoning (DAP) because amnesia is not always present, was first recognised in 1987 in Prince Edward Island, Canada.

Marine biotoxins - Food and Agriculture Organization

The granulocytic "shift to left" reflects marrow response to bacterial infection, and this may be quantified as band count or immature granulocyte count (IGC). The former value, used widely in neonatal sepsis, has been notoriously difficult to measure accurately and precisely. A reproducible, precise, and accurate counting of immature granulocyte counts may be possible with automation.

Chagas disease is a neglected infectious disease in the tropics and an emerging health problem in Europe and the USA. In the past decade, a link has been recorded between ischaemic stroke and *Trypanosoma cruzi* infection in several epidemiological studies, and an increase in stroke prevalence is expected with the ageing of the population infected with *T. cruzi* in Latin America.

Chagas disease and stroke - The Lancet Neurology

Malaria is a mosquito-borne infectious disease affecting humans and other animals caused by parasitic single-celled microorganisms belonging to the *Plasmodium* group. Malaria causes symptoms that typically include fever, tiredness, vomiting, and headaches. In severe cases it can cause yellow skin, seizures, coma, or death. Symptoms usually begin ten to fifteen days after being bitten by an ...

Malaria - Wikipedia

A guidelines development group was formed to assess the available evidence, develop recommendations, and decide on their strength on the basis of the balance between benefits and harms, the evidence quality, cost and resource use implications, and user and patient values and preferences.

New WHO recommendations on preoperative measures for

Pathology Market Overview. The worldwide Pathology showcase is divided dependent on items, type, application, end client, and geology. In view of item, it is ordered into scanners, programming, correspondence frameworks, stockpiling frameworks, instruments, consumables, and administrations.

In Part 1 of this series, I talked about why the basic premise of the acid-alkaline theory is flawed, and I showed that the evidence doesn't support the idea that a net acid-forming diet is harmful to bone health. Now I want to look at the effect of dietary acid load on other health conditions. Can the acidity or alkalinity of your diet affect your risk for muscle loss, cancer, and more?

The Acid-Alkaline Myth: Part 2 | Chris Kresser

Many of you have probably heard of the "alkaline diet". There are a few different versions of the acid-alkaline theory circulating the internet, but the basic claim is that the foods we eat leave behind an "ash" after they are metabolized, and this ash can be acid or alkaline (alkaline meaning more basic on the pH scale). According to the theory, it is in our best interest to make sure ...
