In mathematics, a spline is a function defined piecewise by polynomials. In interpolating problems, spline interpolation is often preferred to polynomial interpolation because it yields similar results, even when using low degree polynomials, while avoiding Runge's phenomenon for higher degrees.. In the computer science subfields of computer-aided design and computer graphics, the term spline ...

REQUIREMENTS FOR A MAJOR IN MATHEMATICS. Mathematics is the study of quantity, structure and space. While mathematics is important in understanding and influencing the physical world around us, mathematics can also be curiosity-driven and enjoyed without the requirement of a particular application.

Mathematical and Computational Sciences | Programs and

Mathematics graduates, who are used to computing and to analytical and structured thinking and who have a high level of competence in problem solving skills are in considerable demand in a wide variety of areas of employment.

Let $r(t)$ be a curve in Euclidean space, representing the position vector of the particle as a function of time. The Frenet-Serret formulas apply to curves which are non-degenerate, which roughly means that they have nonzero curvature. More formally, in this situation the velocity vector $\dot{r}(t)$ and the acceleration vector $\ddot{r}(t)$ are required not to be proportional.
