Sodium nitrite is the inorganic compound with the chemical formula Na NO 2. It is a white to slightly yellowish crystalline powder that is very soluble in water and is hygroscopic. It is a useful precursor to a variety of organic compounds, such as pharmaceuticals, dyes, and pesticides, but it is probably best known as a food additive to prevent botulism. ...

Li et al. demonstrate a noninvasive and biocompatible nanospear by optically trapping a yeast cell and a chain of *L. acidophilus* cells to a tapered fiber probe. The bio-nanospear can be used to probe localized fluorescence from a single leukemia cell in human blood at subwavelength resolution.

Controllable surface modification of nickel–nitrogen (Ni–N) bridge sites is prepared via a simplified vapor-assisted treatment approach. The N modified Ni with distorted structures and suitable N coverage level significantly promotes hydrogen evolution reaction in alkaline conditions.

Arxivsorter ranks papers from arxiv.org based on your own interests.. It simply asks for a few favorite authors and then estimates the relevance of arbitrary papers using information from authorship proximity and semantic similarity.. It is not a filter and therefore does not lose any information.

## Arxivsorter

Graphene is an allotrope (form) of carbon consisting of a single layer of carbon atoms arranged in a hexagonal lattice. It is a semimetal with small overlap between the valence and the conduction bands (zero bandgap material). It is the basic structural element of many other allotropes of carbon, such as graphite, diamond, charcoal, carbon nanotubes and fullerenes.

## Graphene - Wikipedia

Waste-heat recovery with thermoelectric power generators can improve energy efficiency and provide distributed electricity generation. New thermoelectric materials and material performance improvements motivate development of thermoelectric generators for numerous applications with excess exhaust and process heat.

## Thermoelectric generators: Linking material properties and

In plant cells, changes in fluidity of the plasma membrane may serve as the primary sensor of cold stress; however, the precise mechanism and how the cell transduces and fine-tunes cold signals remain elusive.

## Plasma Membrane CRPK1-Mediated Phosphorylation of 14-3-3

'Peking Review' / 'Beijing Review' - the English language news weekly published in China since 1958. This

site has over 1,300 entire issues in PDF format plus many hundreds of individual separate articles, especially on politics, philosophy and political economy, mostly from the Mao era.
