Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

Abstract. The notion of paying college football players has been an ongoing debate since the early 1900s. With current television revenue resulting from NCAA football bowl games and March Madness in basketball, there is now a clamoring for compensating both football and basketball players beyond that of an athletic scholarship.
