Steel is an alloy of iron and carbon and other elements. Because of its high tensile strength and low cost, it is a major component used in buildings, infrastructure, tools, ships, automobiles, machines, appliances, and weapons.. Iron is the base metal of steel. Iron is able to take on two crystalline forms (allotropic forms), body centered cubic and face centered cubic, depending on its ...

A tariff-rate quota (TRQ) is a two-tiered international trade tariff that combines two policy instruments used historically to protect domestic production by restricting imports—import quotas and tariffs. The quotas set a quantitative threshold for a designated time period for imports of a protected domestic product. Under that threshold, tariffs applied to imports are either very low or ...
